

Gentlemen: XM Satellite Radio is a great advancement to radio. With the ownership of broadcast radio stations being bundled into a FEW owners such as Clear Channel, local broadcasting has gone the way of the Model T Ford. Only XM gives the listener the options that broadcast once did. This is especially true in the South Florida area. We need constant traffic information due to the extensive road construction that is going on and will be going on through 2010. Please don't take that away from XM Radio. Thank you, James L. Long
